## KEY PROJECTS

### FFC Gym Management Platform

2024

- **Brief Description:** As my final year project, I developed a comprehensive web platform for gym management to enhance product and service sales, improve member engagement, and streamline communication through digital tools. The platform includes an online store for fitness products, an interactive blog, and administrative tools for managing memberships , reservations and orders
- **Technologies Used:** Django, HTML, CSS, JavaScript, Bootstrap, AJAX js
- **Skills Demonstrated:** Full-stack development, UX/UI design, project management, and implementation of digital communication tools.

## E-commerce Platform for Football Team

2023

- **Brief Description:** Developed a comprehensive e-commerce platform for Raja Club Athletic using Laravel. The website provides fans with the latest club news, including updates from the academy, and features an online store for purchasing a variety of club merchandise. This project aims to offer an interactive platform that keeps fans connected with the club and facilitates the purchase of official products.
- **Technologies Used:** Laravel, HTML, CSS, PHP, JavaScript
- **Skills Demonstrated:** Full-stack development, UX/UI design, project management, and e-commerce implementation.
